Conclusion

## About Us.

Caritas Kitui is the Development Department of the Catholic Diocese of Kitui, established in 1978 and branded as Caritas Kitui in 2010. It aims at promoting human dignity, improved livelihoods and a just society with participation of community.

Caritas Kitui operates within Kitui and Makueni counties in the lower eastern region of Kenya reaching more than 300,000 vulnerable and marginalized rights holders.

Since 2013, Caritas Kitui has consistently sustained over 10 development projects annually, implemented in different pockets of Kitui and Makueni counties and has over 50 staff members annually reaching over 20% and 9% of the population in Kitui and Makueni counties, respectively.

Its work has been geared towards Integral Human Development, which is anchored on three main themes Innovation, Transformation, and Sustenance through integration and human rights-based approaches guided broadly by the Catholic Social Teachings.

## Vision

A sustainable community inspired by the Love of God

Enhance integral human development through partnerships and innovations to achieve a sustainable community.

## Our Values

- Professionalism
- Stewardship and accountability
- Equity and respect
- Dynamism and commitment
- Charity and empathy
- Faith
- Integrity
- Teamwork

# Message from the Bishop, Catholic Diocese of Kitui

Chairperson, Caritas Kitui Board of Management

Dear brothers and sisters in Christ,

It is with a heart full of gratitude and hope that I share this message in the 2024 Impact Report of Caritas Kitui. As the development department of the Catholic Diocese of Kitui, Caritas Kitui remains a living expression of the Church's mission to promote integral human development, inspired by the Gospel values of love, compassion, and social justice.

The foundation of Caritas Kitui is deeply rooted in the Catholic Church's social teaching, which calls upon all of us to stand in solidarity with the poor, safeguard the dignity of every person, and be faithful stewards of God's creation. This year's accomplishments are a clear testament to our shared commitment to these ideals. Through your collective efforts, Caritas has become a beacon of hope to many households across Kitui, responding to both spiritual and material needs.

Caritas Kitui plays a crucial role in transforming communities. From water and sanitation interventions to sustainable agriculture approaches and peacebuilding, its presence brings not only tangible development but also restores dignity and empowers our people to become agents of their change. In a region often challenged by climate variability and limited resources, the relevance of Caritas cannot be overstated.

To our esteemed development partners and collaborators, I convey my heartfelt gratitude. Your generosity, technical support, and steadfast commitment have enabled us to reach the most vulnerable and build resilient communities. We do not take this partnership for granted.

To my fellow members of the Board of Management, I thank you for your wise counsel, strategic oversight, and unwavering support in guiding Caritas Kitui toward impactful and sustainable development.

I take this opportunity to express my deepest appreciation to the Director of Caritas Kitui, the management team, and the entire staff. Your tireless service, often in difficult conditions, is an embodiment of faith in action. Thank you for your dedication and for being the compassionate hands and feet of Christ in our communities.

Let us continue to walk together in solidarity, hope, and service — always guided by the words of the prophet Isaiah: "Is not this the kind of fasting I have chosen: to loose the chains of injustice... to share your food with the hungry and to provide the poor wanderer with shelter?" (Isaiah 58:6-7)

May God bless you all abundantly.

In Christ's service,

Rt. Rev. Joseph Mwangela

Bishop, Catholic Diocese of Kitui

Chairperson, Board of Management – Caritas Kitui

# Message from the Director

## *Together in Hope, United in Action*

**I**t is an honor to present the notable milestones as of Caritas Kitui, the development department of the Catholic Diocese of Kitui, for the year 2024. Grounded in the principles of faith and motivated by compassion, our efforts have been directed towards collaborating with communities to foster resilience, safeguard dignity, and establish sustainable livelihoods.

In 2024, notable progress was realized across the key areas. We enhanced access to water resources, improved sanitation facilities in schools, promoted animal welfare,

supported farmers in transforming degraded lands into productive farmlands, and advanced clean energy adoption through the introduction of improved cook stoves and electric pressure cookers (EPCs). Central to our endeavors was upholding inclusive development, ensuring that children and youth with disabilities accessed education, healthcare, and opportunities for sustainable livelihoods. Additionally, economic empowerment initiatives enabled farming groups to achieve significant income generation through mechanisms such as Savings and Internal Lending Communities (SILCs), Village Savings and Loan Associations (VSLAs), interlocking block production, pasture cultivation, and sustainable enterprises such as briquette production and honey farming.

Through the governance and advocacy programs, participation by citizens in County budgeting and decision-making processes has been greatly enhanced. Partnerships with Water Resources Users Associations (WRUAs), schools, and health institutions further magnified the impact of our collective efforts.

Despite confronting challenges such as a decline in donor funding and policy changes we remain unwavering in our trust in God's providence. As a faith-based organization, this trust continues to guide our mission moving forward

The Caritas Kitui Impact Report 2024 provides an in-depth account of our diverse project initiatives, strategic approaches, and their transformative impact on the communities we serve. None of these accomplishments would have been possible without the invaluable contributions of our partners, government agencies, the Catholic Diocese of Kitui, Caritas Board, dedicated staff members, and the extraordinary resilience of the communities we work alongside. To all these stakeholders, we extend our heartfelt gratitude.

As we look ahead, our commitment remains firm in promoting climate-resilient, inclusive, and economically prosperous communities. This vision aligns seamlessly with the objectives outlined in our Strategic Plan, firmly anchored in our faith-driven approach.

May God bless you abundantly and continue to guide the mission of Caritas Kitui.

**With kind regards,  
Florence Ndeti  
Director, Caritas Kitui**

## ACKNOWLEDGEMENT

We extend our deepest gratitude to all those who made the success of this 2024 impact report and the achievements it captures possible. First and foremost, we appreciate the unwavering support and guidance of the Catholic Diocese of Kitui, led by His Lordship Rev. Joseph Mwongela and the Caritas-Kitui Management, whose leadership and vision have been instrumental in steering these projects towards meaningful outcomes for our communities.

Our sincere thanks go to our generous donors, whose commitment to sustainable development and human dignity has fueled the implementation of the initiatives highlighted in this report. Your contributions have brought hope, resilience, and transformation to countless lives.

We also recognize the dedication and tireless efforts of our Project Coordinators and the entire Caritas-Kitui staff. Your expertise, field presence, and day-to-day commitment have been the backbone of project delivery and community engagement.

To our beneficiaries, thank you for your trust, collaboration, and willingness to embrace new opportunities. Your stories of growth and empowerment are the true measure of this project's success, and they continue to inspire us to serve with even greater resolve.

This report stands as a testament to the collective efforts of all stakeholders. It not only reflects the milestones achieved but also the shared commitment to building a more just, resilient, and thriving society. Together, we continue to sow seeds of change that will yield lasting impact for generations to come.

# Thematic Areas

## **Sustainable Livelihoods and Humanitarian Response**

Projects under this thematic area focus on enhancing community resilience through inclusive economic empowerment and emergency support. They include the Partnership Project, Mtunze Punda Daima, IRRP, STAWI Mashinani Activity Project and the Promoting an Inclusive Community for People with Disability Project.

## **Environment and Climate Change**

This area promotes ecological restoration and climate resilience through initiatives like the Carbon Offset Project, Clean Cooking interventions, and the GREENPARK Project.

## **Institutional Development and Resource Mobilization**

Strengthened organizational capacity and sustainability are pursued under the GASP project, supporting strategic growth and efficient resource utilization.

## **Governance, Advocacy, and Social Inclusion**

Projects like CJPD and the Strengthening Fiscal Transparency and Accountability Project empower communities to demand accountability, uphold human rights, and promote inclusive governance.

# INTEGRATED RISK REDUCTION PROJECT (IRRP)

***To build a thriving and robust community of 2,000 households living harmoniously in a healthy environment that sustainably provides for their needs by 2026 in Kyome -Thaana Ward.***

## **Animal Health & Livelihood Support**

6,975 livestock (cattle, goats, sheep, donkeys, dogs, cats) treated through veterinary clinics → Improved livestock health and productivity, boosting economic resilience for pastoralist households.

## **Agroecology & Food Security**

Farmers trained in agroecological practices: seed saving, terracing, and diversified farming systems.  
Revival of traditional storage methods (Kiinga & Kisumba) boosted food security and preserved Kamba cultural heritage.

## **Rangeland Rehabilitation & Biodiversity**

32 acres of degraded rangelands rehabilitated through improved land management and reseedling → Led to enhanced pasture growth, improved livestock body conditions, higher farmer incomes, and restored biodiversity.

## **Water Access & Community Transformation**

Constructed Tumila Earth Dam and 4 sand dams in Kyome-Thaana Ward, serving 350 households. This has reduced the time and burden of fetching water, improved water quality, enhanced water access hence improving education outcomes and enhancing women economic participation.

***We watched our land die slowly. Springs dried up, gullies formed, and we had no idea how to stop it.***

**MAMA JUMA**

***In Itumba village, Kanyaa Sublocation, 59-year-old Winfred Kimanzi (Mama Juma) turned a barren 3.5-acre plot into a vibrant, productive ecosystem through IRRP training in soil and water conservation, agroecology, and land restoration.***

Heavy rains during OND 2023 and MAM 2024 disrupted project timelines, particularly affecting water infrastructure construction.

**Continuous stakeholder engagement** - including community leaders, county & national government is critical in sustaining community participation and adapting to climate disruptions.

# STAWI MASHINANI ACTIVITY

## STRENGTHENING WATER RESOURCES MANAGEMENT

### STRENGTHENING WATER RESOURCE USER ASSOCIATIONS (WRUAS)

Two WRUAs (Upper Ikoo and Upper Tyaa) were identified and supported, with one Sub-Catchment Management Plan strengthened and a WRUA resource mobilization training conducted, resulting in three proposals submitted to the Water Resources Authority. A county-level coordination forum was also established to enhance collaboration and catchment protection in upper Ikoo.

1

2

### CAPACITY BUILDING FOR SUSTAINABLE AGRICULTURE

3 youth and 3 women farmer groups in Kitui Central and Mwingi West were trained on regenerative and conservation agriculture practices, contributing to improved soil health and climate resilience.

### CATCHMENT PROTECTION AND ENVIRONMENTAL RESTORATION

3

Practical training and demonstrations on catchment protection techniques such as Zai pits, semi-circular bunds, terraces, and tree planting were conducted to promote land restoration and water retention.

### WATER RESOURCE ASSESSMENT AND STRATEGIC PARTNERSHIPS

4

Water quality testing was conducted for the Ndundumini borehole ahead of its rehabilitation. Key agricultural value chains were identified, and partnerships among WRUAs, local authorities, and development partners were fostered for integrated water resource management

### CHALLENGES

#### Human Encroachment and Unsustainable Irrigation Practices

Catchment areas, particularly along riverbanks, continued to face degradation due to farming and irrigation activities. These unsustainable practices undermined efforts in catchment protection and threatened water resource sustainability.

### LESSONS LEARNED

There is a need for stronger enforcement of riparian protection policies, increased community sensitization on the long-term impacts of encroachment, and promotion of alternative livelihoods that are compatible with catchment conservation.

# MTUNZE PUNDA DAIMA

## *Restoring Dignity: The Story of Donkey Welfare in Kitui*

From April 2024, Caritas Kitui, with support from The Brooke East Africa embarked on a transformative journey to improve the welfare of working donkeys across the county. The project has engaged 88 Donkey Welfare Groups through targeted trainings, promoting humane treatment and best husbandry practices.

22 primary schools were reached to instill values of care and compassion for donkeys among young learners, fostering a culture of empathy from an early age.

In dusty marketplaces and remote villages, over 6,500 donkey owners were reached through vibrant roadshows and media campaigns. At the Kitui Agricultural Show, nearly 10,000 people stopped by the donkey welfare booth—each one walking away with new knowledge and inspiration to treat donkeys with care and compassion.

*“The Mtunze Punda story reminds us that caring for our donkeys is not just an act of kindness, but a way to protect the livelihoods and dignity of our communities. Let us be champions of compassion and responsibility, ensuring every donkey is treated with the respect it deserves”*

**Ambrose Musyimi, The Project Coordinator**

Animal health also saw major strides. Through a certified CPD workshop, 87 Animal Health Practitioners (AHPs) sharpened their skills. 30 AHPs and 30 agrovets were mentored through the mentoring frameworks done by the Project Veterinarians. This strengthened service delivery and improved access to veterinary care for thousands of donkeys.

In the shadows, illegal donkey hide trade remained a threat—but the project took it head-on. Caritas Kitui joined hands with legal and health institutions like the Mwingi Court Users Committee and County One Health Unit, together, they engaged over 36 high-level security stakeholders, building a united front against exploitation and bush slaughter.

Resilience was also planted—literally. Two community groups harvested over 600 bales of pasture with each 88 members replicating in their farms to ensure reliable feeds for their donkeys. Meanwhile, 65 savings groups (SILC) enabled donkey owners to invest in land, livestock, and small businesses funding donkey clinics and boosting livelihoods in the process. 2 offtake wells have been constructed and solarized at Tseikuru and Mui Ward reducing walking distance and providing clean water for the donkeys and their owners.

And in one of the project's most powerful moments, 101 donkeys were rescued from the brink of slaughter, a case now remembered as **“Rescued from the Arms of Death.”**

**Challenges remained,** Cartels exploited legal loopholes, and unregulated trade kept donkeys moving across borders unchecked. Yet, amidst these hurdles, a strong lesson stood out: community change agents, armed with compassion and persistence are key to lasting change.

As the project moves into its final quarter, it stands as a story of resilience, partnerships, and a growing movement that says: every donkey matters.

## Improving Water Access and Livelihoods

### WATER ACCESS

Constructed two sand dams (Kwamunyoki and Kwa Nzule), reducing water access distance from 15 km to 3 km for 600 households. Developed Kasunguni off-take well, benefiting 100 households by cutting water distance from 8 km to 2 km.

### SCHOOL SANITATION

Installed handwashing facilities in Mwalili and Mutunga primary schools, improving hygiene for 450 pupils and teachers.

### LIVELIHOOD SUPPORT & ECONOMIC EMPOWERMENT

Distributed Galla he-goats to 184 vulnerable households enhancing goat breeds and livelihoods for 124 households. Trained 60 individuals in goat and poultry management. Supported 6 SILC groups (150 members), who saved Ksh. 1,791,075 by end of 2024

### SUCCESS STORY

Amid severe water scarcity in 2017, a community group adopted the SILC savings model, contributing just Ksh. 200–500 monthly. Through income earned from making interlocking blocks, they invested in goats and later benefited from improved Galla breeds supported by the project. By the end of 2024, their dedication transformed into a thriving asset base worth Kes. 492,525 and a growing goat stock of 73 kept by members. What began as a water intervention has evolved into a beacon of resilience and economic empowerment.

#### Challenges

1. Water scarcity due to inadequate rainfall affecting dam performance

#### Lessons Learned

1. Transparent and frequent communication with stakeholders is essential.
2. Realistic planning and timelines improve project execution.
3. Regular meetings foster collaboration, early problem-solving, and shared ownership.

*"We started by saving for water, but we ended up building wealth. Today, our goats and savings give us hope we never imagined back in 2017."*

— IMANI SHG  
Member, Nuu Ward

# SPECIAL NEEDS PROJECT

## PROMOTING AN INCLUSIVE SOCIETY FOR PERSONS WITH DISABILITIES

### Inclusive Education

- 28 CYWDs retained in school through education sponsorships
- 3 pilot schools (Central Primary, Kaveta Primary and St Michael Academy) implementing inclusive education where 15 children have been enrolled.

### KEY ACHIEVEMENTS

### Inclusive Livelihood and Social Empowerment

- 53 parents and caregivers practicing kitchen gardening after permaculture training.
- 113 parents and caregivers practicing SILC with a saving base of KSh. 30,000-70,000. The beneficiaries can now buy diapers and drugs for their CWDs. and Kitchen garden
- 4 Youths with disabilities linked to job opportunities.

### Challenges

Limited Funding to reach to the most remote parts of the County and facilitating county Ministry of Health Disability assistants.

### Lessons Learned

Future project budgets should include a contingency fund to handle uncertainties like drought and medical emergencies.

***“Caritas Kitui advocates for an inclusive society where persons with disabilities are resilient and lead a quality life.”***

### Healthcare and Rehabilitation

- 1,040 CYWDs identified, screened & referred for intervention during AIC-Cure Children Mobile Clinics.
- 3 medical camps with EARC Mumias and EARC Kitui at Muthale Satellite, Mutomo Special Sch., and Good Shepherd
- 116 CYWDs accessed epilepsy drugs and diapers
- 80 Health Workers & CHPs trained on early identification of disabilities.

### KEY MILESTONES

- 94 Individuals Assessed for Disability Certification
- 173 Previously Hidden Learners Identified & Enrolled.
- 5 EARC Kitui Teams Trained on Modern Assessment Tools
- 5 Children Received Free Orthopedic Neck Collars
- 181 Clients Treated for Severe Ear Infections

## GREENING WITH JOBS; ENVIRONMENTAL PRESERVATION AND RESTORATION IN RURAL KENYA (GREENPARK)

***Promoting “Green” economic growth, employment, and income in rural communities in Kitui and Makueni through sustainable consumption and production practices.***

### ACHIEVEMENTS

#### **Adoption of Climate-Friendly Technologies**

10867 Communities members in Kitui and Makueni embraced sustainable technologies including solar dryers, biogas units, charcoal coolers, and a sump well—boosting nutrition, clean energy use, post-harvest management, and irrigation-based farming.

#### **Growth of Green Enterprises**

Green business initiatives flourished through support to entrepreneurs and groups in eco-friendly fuel production, value addition, sustainable charcoal making, and access to finance—leading to increased adoption of green strategies and income diversification

#### **Enhanced Environmental Stewardship and Awareness**

Thousands of farmers and students engaged in natural resource conservation and environmental learning through training, media outreach, tree planting, and school-based initiatives—resulting in large-scale land restoration and behavioral change.

**10**

solar dryers distributed to farmer groups.

**12**

Bio-gas Units Installed in households and institutions.

**24**

groups producing eco-friendly fuel alternatives using kilns and briquette machines

**1**

sumpwell excavated irrigating 4 acres farmland

### CHALLENGES

- Low Adoption of Tree Growing due to persistent water scarcity.
- Affordability Barrier for climate-smart technologies like biogas, solar dryers, and briquette equipment.

**Improving post harvest management**

### LESSONS LEARNED

- The long-term impact of interventions becomes evident over 2–3 years.
- Skill transfer and business maturity take time - continued mentorship needed.
- Multi-stakeholder collaboration is essential for scaling and sustainability - pooling government, private sector, and community efforts enhances impact.

**18+**

Green enterprises have integrated green business strategies

**CHARCOAL COOLERS**

**10+**

**4615**

acres conserved through tree and grass planting, terracing, gabions and bunds

# CARBON OFFSET PROJECT

*Promoting the use of improved cook stoves to reduce CO<sub>2</sub> emissions and combat climate change in rural communities.*

## OVERVIEW

Carbon offset project aims to reduce CO<sub>2</sub> emissions contributing to climate change by promoting the use of improved rocket cookstoves among rural communities in Kitui County, Kenya. By replacing traditional 3 stone fire cooking method with more efficient stoves, the project significantly cuts down on firewood consumption and associated emissions. The project's agenda aligns with SDG 13: Climate Action, which calls for urgent action to combat climate change and its impacts, which includes reducing greenhouse gas emissions.

## PROJECT PROGRESS

As part of ongoing community-driven sustainability efforts, a total of 6,807 individuals have been sensitized through various grassroots platforms such as organized community groups, village elders' meetings, and consumer incentive forums. These mobilization activities were facilitated by village elders and local administrators, ensuring strong local engagement and trust.

Thanks to these efforts, the project has achieved the construction of 30,081 improved cook-stoves from 2013 to 2024. These stoves have played a pivotal role in creating cleaner air and healthier kitchen environments for households across rural communities. Each stove contributes to climate mitigation by reducing carbon emissions by approximately 1 ton of CO<sub>2</sub> annually.

By the end of 2023, these collective actions led to a significant impact, with **152,465 tons of CO<sub>2</sub>** equivalent emissions reduced, as verified by Gold Standard in the **Fastenaktion Project Annual Report**. Building on this momentum, an additional **3,102 new cookstoves** were installed in 2024 alone against annual target of 2500 stoves, further accelerating CO<sub>2</sub> reductions and demonstrating the growing adoption of clean energy solutions in rural settings.

## CHALLENGES AND LESSONS

A total of **192 stoves** were lost because of collapsed homes, migration, or repurposed kitchens. Unpredictable rains also disrupted early-year stove demand.

Nonetheless, **key lessons** emerged: longer stove usage leads to greater CO<sub>2</sub> reduction; maintaining compliance with Gold Standard is essential; integration with other community projects boosts adoption; and consistent use and maintenance of stoves is critical. These insights highlight the need for clear repair mechanisms, community engagement, and sustained usage to maximize environmental impact and improve long-term success.

## MBATHA KIMEU'S STORY

"I began my journey in 2018 after a training session. Since then, the stove building has enabled me to pay school fees for my five children. In 2024, I bought a motorbike, which helps me reach more households. I also set up a small shop for my wife in Kiseuni Trading Center. This work has truly changed our lives."

## CLEAN COOKING PROJECT

Caritas Kitui's Clean Cooking Project aims to transform household energy use by promoting the adoption of clean, energy-efficient cook stoves. Traditional cooking methods, which rely heavily on firewood and charcoal, pose serious health risks due to indoor air pollution and contribute significantly to deforestation and carbon emissions.

This project works with community groups, local leaders, and partners to raise awareness, train households, and distribute improved cook stoves. By replacing traditional stoves, the project not only reduces exposure to harmful smoke but also helps households save time and fuel, contributing to better health, environmental conservation, and improved livelihoods.

“By embracing electric cooking, we are not only protecting our planet—we are improving lives. Let's continue to invest in solutions that are both climate-smart and people-centered —”

*Queen Wambua -Project Officer*

## BENEFITS

### Energy saving

The electric pressure cooking stoves are efficient by cook food faster, which significantly reduces overall energy consumption. Their design minimizes energy loss, making them ideal for households looking to lower power usage while maintaining cooking convenience.

### Cost effective

Reduces fuel consumption, lowering household cooking expense

### Efficiency

Cooks food faster using less energy, saving time in meal preparation.

**30**

EPCs procured

**2500**

people reached

# GOAT & SHEEP PROJECT

The Goat and Sheep Project(GASP) initiative is a rural enterprise in Kitui focused on establishing a sustainable farm that offers fee-based goat breeding services and produces fodder, food crops, honey, and livestock. The project aims to generate income, strengthen food security, and enhance the resilience of local communities by leveraging the area's agricultural potential.

## Transformation

From seed to sustenance, GASP is transforming drylands into lifelines empowering families with food, income, and hope.

## CHALLENGES

### 1. Unpredictable Climate Patterns

Erratic rainfall leading to frequent crop failures  
Prolonged droughts causing acute water shortages for irrigation and livestock

### 2. Livestock Value Chain Constraints

Low livestock prices during drought due to poor animal condition

### 3. Land Tenure and Security Risks

Threat of land encroachment and potential land grabbing compromising farm sustainability

**Beans**

**6,390Kg**

**Harvested**

**caster oil**

# Strengthening Fiscal Transparency & Accountability in Kitui County

## *From Silence to Action: How Kitui Citizens Are Shaping Their Future*

In the once-quiet villages of Kitui, public budgeting and fiscal accountability felt distant and inaccessible - complex matters reserved for county elites. That has changed. Through the Strengthening Fiscal Transparency and Accountability Project, a new wave of civic engagement has taken root across five wards in Kitui County. The initiative successfully empowered over 12 grassroots Accountability Champions in 5 wards in Kitui County and multiple civil society organizations (CSOs) with practical knowledge in public finance management, county budget cycles, and social accountability tools.

### MILESTONE

12

**Trained Accountability Champions** are now catalyzing grassroots governance by educating community members and leading budget advocacy efforts.

24

stalled community projects were socially audited by communities under the guidance of the champions - reviving public interest in service delivery and demanding accountability.

4

**Auditor General and Budget Implementation Review Reports** were analyzed by CSOs, generating evidence-based advocacy and fueling citizen dialogue on resource utilization.

**Increased civic participation:** Champions mobilized community members to attend public participation forums, structure their development priorities, and submit memorandums - a shift from passive listening to active citizen agency.

### CHALLENGE

**Limited access to Bills of Materials (BoMs)** constrained thorough project audits.

**Lack of political goodwill** to act on audit findings diminished trust in some areas.

**Inadequate civic education agents** meant that ¾ of Kitui County Wards remained unreachable.

### LESSONS LEARNED

**Simplifying financial documents**, using relatable language, and **proactive community engagement** notably increased trust, interest, and participation. Additionally, **early involvement in budget discussions** and the **formation of unified CSO coalitions** emerged as best practices for sustaining momentum

# CATHOLIC JUSTICE AND PEACE DEPARTMENT (CJPD)

## The Power of Lenten Campaign Funds

*Promoting faith-driven giving and justice through mobilizing resources to support vulnerable communities and promote peace and social justice.*

## Lenten Campaign Contributions 2024

**Institutions**  
Ksh. 1,424,713

**Parishes**  
Ksh. 1,199,113

**Total = Ksh. 2,623,826**

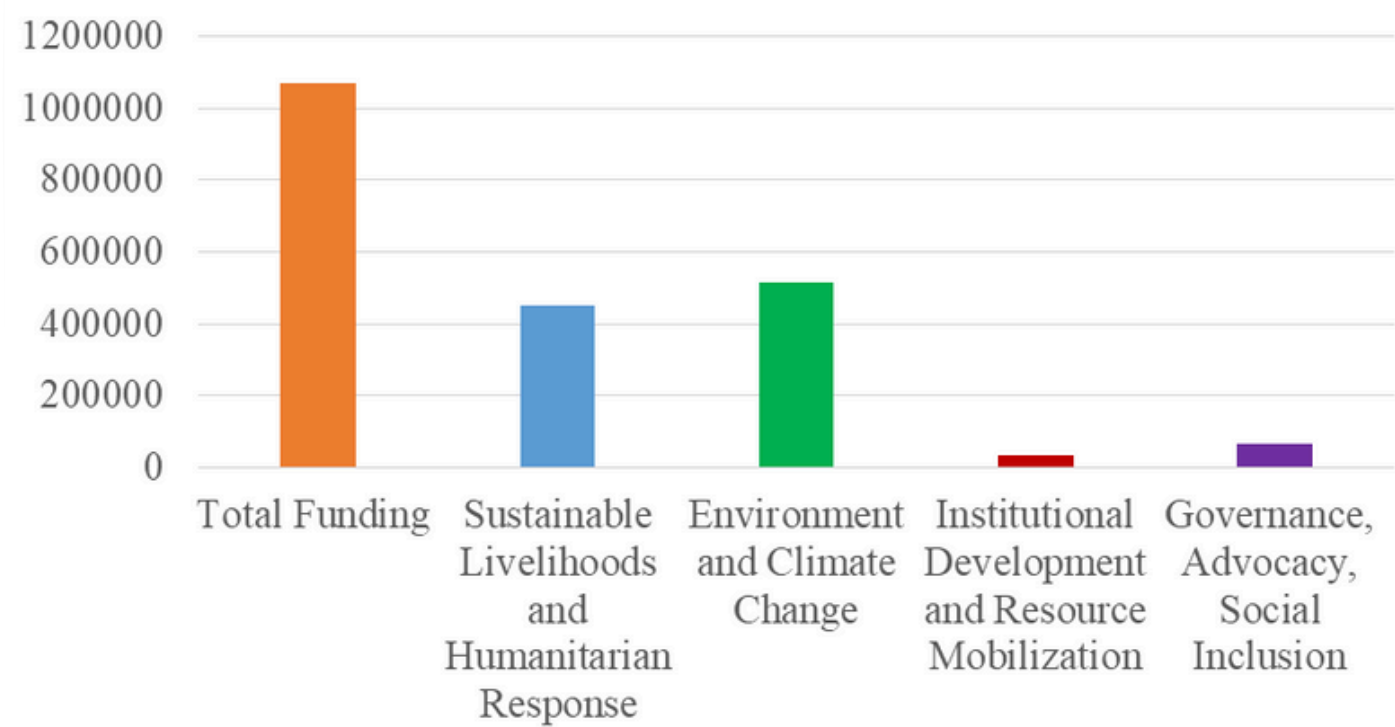

A mud thatched house of one of our underprivileged households in Mutune Parish was blown off by strong winds that were accustomed by heavy rains and was left homeless. Given our mandate, we rolled our sleeves to help her build a place she could call home.
